Extreme Edge - Premium Scissor Sharpening for Hairdressers / Barbers

Amazing Reputation - Over 200, All 5 Star Reviews - Over 7200 FB Followers

We sharpen all hairdressing scissors / thinners (including left-handed) and provide a full scissor sharpening service, which includes: repairs, re-balancing, re-alignment, polishing and setting the correct tension.

Nearly all new premium hairdressing scissors on the market are originally convex (razor-sharp edges that are barely visible to the naked eye).

In the UK, there is a significant issue with many sharpeners lacking the necessary machinery and knowledge to correctly re-convex hairdressing scissors. Instead, they rely on grinding machines that remove the delicate convex edges and transform them into bevel scissors (bevel scissors are used in the dog grooming industry).

Putting thick bevel edges on convex scissors shortens their life, as too much metal is removed and the scissors cannot be used for their intended purpose; to perform advanced cutting techniques such as slice, slide and chipping.

Why Choose Us? We are one of the only sharpening companies in the UK, who can fully convex hairdressing scissors.

We do not use a grinding machine. It is shocking that so many sharpeners spend only 10 minutes sharpening scissors, so they can get through as many as possible in a day. You need to be aware that it is impossible to correctly sharpen hairdressing scissors in 10 minutes - We will not compromise our high standards and will spend as long as it takes to ensure every pair of scissors we service, cuts perfectly.

We are a premium service, therefore if scissors are sent to us with convex edges, we will maintain the edges.

If a poor sharpener changed your convex scissor blades to slight bevel edges, we may be able to restore your scissors back to their original convex edges.

Sadly, if your convex scissor blades have been replaced with heavy bevel edges, it will not be possible to restore them back to their original convex edges. However, we can still significantly enhance performance and ensure your scissors cut perfectly before returning them to you.

We can drastically improve most hairdressing scissors that have been dropped and/or have slight nicks. However, scissor blades cannot be re-shaped because the composition and structure of the steel means there is a chance a blade could snap.

We take scissors apart, so that the whole length of the blade is sharpened..... We use a water-cooled machine to ensure that scissors never over-heat..... We hand sharpen hairdressing scissors using various grades of wet and dry paper, Japanese wet stones and 2 grades of polishing leathers..... This process creates a mirror finish, making the blades feel smooth and sharp..... We also remove the absolute minimum amount of metal, which preserves the life of scissors.

We will contact you as soon as we receive your scissors to confirm receipt Make sure you tell us your e-mail and mobile so we can contact you.

Turnaround: Our turnaround is two working days from receipt of payment ... Our same day service is an extra £4.00 per pair of scissors We will post any days we will be closed for business on our website.

Payment: If you request **PayPal** or **Credit/Debit Card**, we will email you an extremely secure link which will redirect you to PayPal. Here you can either pay via PayPal or you can check out as a guest, which will enable you to use your Credit/Debit card.....If you request a **Bank Transfer**, we will contact you to give you our bank details.
